

Compost Feedstock and On-Farm Management Record

Please complete this section if you are producing compost on-farm.

A. Compost Feedstocks

Note that the following are prohibited as compost feedstocks:

- Sewage sludge
- Compost starter and feedstocks fortified with substances not included in this standard or prohibited by par. 1.4 of CAN/CGSB 32.310
- Leather by-products
- Glossy paper
- Waxed cardboard
- Paper containing coloured ink
- Animal, animal products and animal by-products that are not guaranteed free of the risk materials specified in the definition of *Bone meal* in CAN/CGSB-32.311

****Note** that except for animal manures, feedstocks that may be contaminated with substances not included in CAN/CGSB-32.311 or prohibited by par. 1.4 of CAN/CGSB-32.310 shall require documentation to confirm the absence of these substances or documentation substantiating the common degradation of such contaminants during the composting process.

Feedstock (Please list the specific feedstock, and check the appropriate columns to the right)	Animal Manure	Confirm that animal manure conforms to par. 5.5.1 of CAN/CGSB-32.310	Animal, Animal Products and By-products	Check if guarantee has been obtained that all animal, animal products and animal by-products are free of risk materials as described in <i>Bone meal</i> of CAN/CGSB-32.311	Documentation on file to confirm ** above for animal, animal product and animal by-product feedstocks	Plants and plant by-products (incl. forestry and sourced separated yard debris)	Documentation on file to confirm ** above for plants and plant by-product feedstocks	Soils and minerals	Documentation on file to confirm ** above for soils and minerals feedstocks
