TABLE II Continued

- i. For any kind or species not set out in Schedule I and having 16 to 50 seeds per gram, seed shall meet the minimum weed seed and other crop seed standards set out in Table II. (6(2)(b))
- ii. Barley seed that has been treated with a product registered as a control product under the *Pest Control Products Act* for the control of true loose smut (*Ustilago nuda*) is exempt from the standards for true loose smut set out in Column 9 of Table II to Schedule I. (6(3))
- iii. Despite Table II to Schedule I, Canada Foundation No. 2 oats and Canada Registered No. 2 oats may contain one secondary noxious weed seed per 10 kg. (7(1.3))
- iv. Despite Table II to Schedule I, Canada Certified No. 1 oats may contain one secondary noxious weed seed per 2 kg. (7(1.4))
- v. Despite Table II to Schedule I, Canada Foundation No. 2 seed other than oats, Canada Registered No. 2 seed other than oats and Canada Certified No. 1 seed other than oats may contain one secondary noxious weed seed per 5 kg. (7(1.5))
- vi. Seed to which Table II to Schedule I applies shall be free from Tartarian buckwheat in Manitoba, Saskatchewan, Alberta and British Columbia. (7(2))
- vii. Seed to which Table II to Schedule I applies shall be free from wild oats in Quebec, Nova Scotia, New Brunswick and Prince Edward Island. (7(3))

Note: In Table II, false wild oats are considered as oats in the grading of oats. However, if found in any crop other than oats, it should be considered as other crop seeds.

TABLE II.1

Applicable to:

- (a) Sainfoin *Onobrychis viciifolia* Scop.
- (b) Vetch, hairy *Vicia villosa* Roth. subsp. *Villosa*
- (c) Vetch, Hungarian *Vicia pannonica* Crantz
- (d) Vetch, common *Vicia sativa* L. subsp. *sativa*

- i. Every Canada Certified No. 1 Cereal Mixture and Canada Certified No. 2 Cereal Mixture shall contain only seed of pedigreed status and only one variety per kind or species. (7(1)(g))
- ii. Despite Table III to Schedule I, Canada Certified No. 1 Cereal Mixture seed may contain one secondary noxious weed seed per 5 kg. (7(1.6))
- iii. Seed to which Table III to Schedule I applies shall be free from Tartarian buckwheat in Manitoba, Saskatchewan, Alberta and British Columbia. (7(2))
- iv. Seed to which Table III to Schedule I applies shall be free from wild oats in Quebec, Nova Scotia, New Brunswick and Prince Edward Island. (7(3))
- v. In addition to the standards set out in Table III to Schedule I, kinds or species of seed listed in Schedule I shall meet the minimum percentage of germination set out in the Table in which they appear. (7(10.1))

Note: In Table III, false wild oats are considered as oats in the grading of oats. However, if found in any crop other than oats, it should be considered as other crop seeds.

TABLE XI Continued

- i. For any kind or species of grass not set out in Schedule I and having 1,500 or fewer seeds per gram, seed shall meet the minimum weed seed and other crop seed standards set out in Table XI. (6(2)(f))
- ii. Notwithstanding the kinds and species of seeds set out in Table XI to Schedule I,
 - a. Subcolumn 1 of column 10 applies only to Chewing's Fescue, meadow fescue, red fescue, creeping red fescue, tall fescue, annual ryegrass, intermediate ryegrass and perennial ryegrass; (7(7)(a))
 - b. Subcolumn 2 of column 10 applies only to smooth brome grass, meadow brome grass, sweet brome grass, fine-leaved fescue, hard fescue, sheep fescue, various-leaved fescue, creeping foxtail, meadow foxtail, orchardgrass, beardless wheatgrass, northern wheatgrass, pubescent wheatgrass, slender wheatgrass, streambank wheatgrass, Altai wildrye, Dahurian wildrye and Russian wildrye; (7(7)(b))
 - c. Subcolumn 3 of column 10 applies only to crested wheatgrass, intermediate wheatgrass, Siberian wheatgrass, tall wheatgrass, western wheatgrass and tall oatgrass; (7(7)(c))
 - d. Subcolumn 4 of column 10 applies only to reed canarygrass; (7(7)(d))
 - e. Subcolumn 1 of column 11 applies only to Chewing's fescue, meadow fescue, red fescue, creeping red fescue, tall fescue, annual ryegrass, intermediate ryegrass, perennial ryegrass and reed canarygrass; (7(7)(e)) and
 - f. Subcolumn 2 of column 11 applies only to smooth brome grass, meadow brome grass, sweet brome grass, fine-leaved fescue, hard fescue, sheep fescue, various-leaved fescue, creeping foxtail, meadow foxtail, tall oatgrass, orchardgrass, beardless wheatgrass, crested wheatgrass, intermediate wheatgrass, northern wheatgrass, pubescent wheatgrass, Siberian wheatgrass, slender wheatgrass, streambank wheatgrass, tall wheatgrass, western wheatgrass, Altai wildrye, Dahurian wildrye and Russian wildrye. (3) Reasonably free from soft bulbs and containing not more than 5% sprouts for yellow and 10% for white, red and globe.
2. Canada No. 2 (Large)	2.5 to 3.5		

- i. The diameter of sets set out in column 2 of Table XXI to Schedule I do not apply to multiplier onions. (7(11))
- ii. For the purposes of Table XXI to Schedule I, a tolerance of 3 % by weight is allowed for the oversized or undersized sets for each grade of onion sets. (7(12))

TABLE XXI Continued

Definition of Terms Used in Column 4

<p>“Mature, well cured” means that the sets have necks that are well dried out and have not more than 1% and 2% thick necks in Canada No. 1 and Canada No. 2 sets, respectively.</p> <p>“Sound” means that the set is firm and neat and will yield only slightly to moderate pressure.</p> <p>“Practically free from tops, dirt, leaves or other foreign matter” means free for all intents and purposes. Tops, dirt, leaves or other foreign matter should not exceed 1% by weight and not more than 25% of the sets should have tops 6.5 cm long or longer.</p> <p>“Practically free from disease, decay and moulds and from insect, mechanical, frost or other damage” means that not more than 3% combined of the bulbs should be so affected.</p> <p>“Practically free from sprouted bulbs” means that, for yellow sets, not over 3% have visible sprouts and, for red, white and globe sets, that not over 6% have visible sprouts.</p> <p>“Practically free from soft bulbs” means that such bulbs should not be in excess of 3%.</p>	<p>“Reasonably free from tops, dirt, leaves or other foreign matter” means that not more than 35% of the bulbs should have tops over 6.5 cm long and dirt, leaves or other foreign matter should not exceed 2% by weight.</p> <p>“Reasonably free from disease, decay and moulds and from insect, mechanical, frost or other damage” means that not more than 4% combined of the bulbs should be so affected.</p> <p>“Reasonably free from soft bulbs” means that not more than 5% combined of the bulbs should be so affected.</p> <p>“Sprouted bulbs” means those bulbs with sprouts exceeding 0.6 cm in length.</p>

TABLE XXII

Applicable to all of the kinds of seeds referred to in Tables I to XX except those referred to in Tables III and XIII to XV:

1. Canada Foundation Substandard seed is seed of Foundation status that meets the standards for purity for Canada Foundation No. 2 grade seed.
2. Canada Registered Substandard seed is seed of Registered status that meets the standards for purity for Canada Registered No. 2 grade seed.
3. Canada Certified Substandard seed is seed of Certified status that meets the standards for purity for Canada Certified No. 2 grade seed.
4. Canada Foundation Substandard (Purity) seed is seed of Foundation status that meets the standards for purity for common grade seed.
